

"Nurse Question","Patient Response"

"What brings you to the ER today?" , "I've been feeling really unwell with a fever and a bad cough."

"How long have you been experiencing these symptoms?" , "It's been about three days now."

"Can you describe the quality of your cough?" , "It's a dry cough, but it feels really harsh."

"On a scale of 1 to 10, how severe is your fever?" , "I would say it's around an 8. I've been feeling really hot."

"Have you noticed anything that triggers your cough or fever?" , "It seems to get worse at night."

"Is there anything that makes your symptoms better?" , "Not really, I've tried taking some over-the-counter medicine, but it hasn't helped much."

"Do you have any other symptoms besides fever and cough?" , "Yes, I've also been feeling short of breath and have a headache."

"Can you tell me more about your shortness of breath?" , "It feels like I can't catch my breath, especially when I try to move around."

"Do you have any pain? If so, where is it located and how would you describe it?" , "I have some pain in my chest, it feels tight and sharp."

"Have you experienced any vomiting?" , "Yes, I vomited once this morning."

"Do you have any past medical history we should know about?" , "I have asthma, but it's usually well-controlled."

"Are you currently taking any medications?" , "I take an inhaler for my asthma and some allergy medication."

"Do you have any known allergies?" , "I'm allergic to penicillin."

"Is there any relevant family history we should be aware of?" , "My mother has a history of asthma and my father had heart issues."

"Can you tell me about your social history?" , "I live alone and work from home. I don't smoke, but I do drink socially."

"Have you had any recent travel or exposure to sick individuals?" , "I was on a flight last week and a couple of people around me were coughing."

"Have you had any recent vaccinations?" , "I got my flu shot a month ago, but I haven't had the COVID vaccine yet."
