

"Nurse Question","Patient Response"

"What brings you to the ER today?","I've been having severe stomach and abdominal pain."

"When did the pain start?","It started about 4 hours ago."

"Can you describe the quality of the pain? Is it sharp, dull, cramping, or something else?","It's a sharp pain, and it feels like it's cramping."

"On a scale of 1 to 10, how would you rate the severity of your pain?","It's about an 8 out of 10."

"Does anything trigger the pain or make it worse?","It gets worse when I eat or move around."

"Have you found anything that helps alleviate the pain?","Lying still seems to help a little."

"Are you experiencing any other symptoms besides the abdominal pain?","Yes, I've also been feeling nauseous and I vomited once."

"Do you have any past medical history that we should know about?","I have a history of gastritis."

"Are you currently taking any medications?","I take omeprazole for my stomach issues."

"Do you have any allergies to medications or other substances?","No, I don't have any allergies."

"Is there any relevant family history we should be aware of?","My mother had a history of ulcers."

"Can you tell me about your social history? Do you smoke or drink alcohol?","I don't smoke, but I do drink occasionally on weekends."

"Have you had any recent illnesses or infections, like a cold or flu?","No, I haven't been sick recently."

"Have you experienced any changes in your bowel habits or appetite?","Yes, I've lost my appetite and haven't been able to eat much."

"Do you have any chest pain, shortness of breath, or fever?","No chest pain or shortness of breath, but I do feel a bit feverish."
