

"Nurse Question", "Patient Response"

"What brings you to the ER today?", "I've been having severe stomach and abdominal pain."

"When did the pain start?", "It started about 4 hours ago."

"Can you describe the quality of the pain? Is it sharp, dull, cramping?", "It's a sharp pain, and it comes in waves."

"On a scale from 1 to 10, how would you rate the severity of your pain?", "It's about an 8 right now."

"Have you noticed anything that triggers the pain?", "It gets worse when I eat or move around."

"Is there anything that makes the pain better?", "Lying still seems to help a little."

"Are you experiencing any other symptoms along with the pain?", "Yes, I've been feeling nauseous and I vomited once."

"Do you have any past medical history we should know about?", "I have a history of gastritis."

"Are you currently taking any medications?", "Just some over-the-counter antacids."

"Do you have any allergies to medications or other substances?", "No, I don't have any allergies."

"Is there any relevant family history we should be aware of?", "My mom has had stomach issues, but nothing serious."

"Can you tell me about your social history? Do you smoke or drink alcohol?", "I don't smoke, but I do drink socially on weekends."

"Have you had any recent illnesses or infections?", "I had a cold last week, but I thought I was over it."

"Have you experienced any chest pain, shortness of breath, or fever?", "No chest pain or shortness of breath, but I do feel a bit feverish."

"Have you had any changes in your bowel habits or urination?", "No changes there."

"Is there anything else you think we should know?", "No, that's everything I can think of."
